The very latest from Wichita Clutch

# Engineered Solutions

Wichita goes with the flow

Our Oil Immersed HBS Brake will soon be operating in one of the worlds most challenging power transmissions environments! Lunar Energy have created an innovative new undersea turbine and the Wichita brake is integral to its design

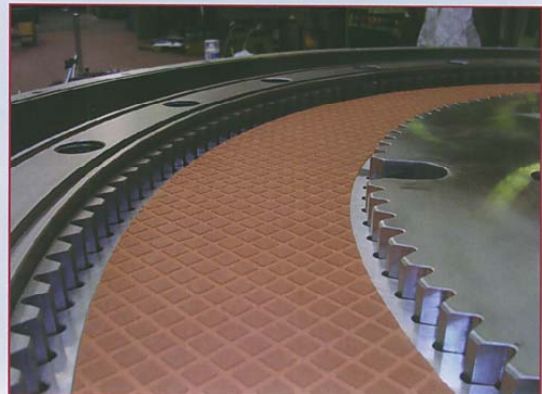

Wichita was chosen because of its long and proven track record in the supply of heavy-duty Clutch and Brake solutions to the industrial sector. Another significant factor contributing to our involvement in such a prestigious project is our commitment to design flexibility, an essential prerequisite in this type of specialised application
